

## YOUR CHALLENGE

- **Little cyber automation** with growing digital footprint
- **Teams are overloaded** with alerts and disparate tools
- **Decreased visibility** with remote and cloud
- **Threat Detection Data** is not easy to use or manage

## AGILEBLUE SOLUTION

- Human SOC with SIEM, automation, Machine Learning and User Entity and Behavior Analytics
- Identifying Indicators of Attack, 24/7, before a breach occurs
- 100% visibility and vulnerability mitigation
- Risk profile for easy, usable, and actionable data

## OUR AUTOMATED RISK DASHBOARD

Risk Profile is based on 13 critical security factors and Indicators of Attack (IoA) from MITRE

## WHAT SETS US APART

Our cyber risk scoring algorithm shows your risk gaps in real-time

Automated threat monitoring means faster detection in real-time

Our Silencer technology reduces false positives with a 95% confidence score

## ADVANTAGES AND STRENGTHS

### Accuracy & Speed

False positive alerts are a waste of time and money. AgileBlue's 'Silencer' is a machine learning and user behavior analytics platform that boasts a 95% true positivity rate.

### Risk Score Transparency

When you work with AgileBlue, you'll get a custom dashboard that gives you real-time insight into your system that you can actually read and present to your c-suite.

### Customer Service

Real people. Real help. Consistent update meetings, one-on-one support, two-way communication for quick access to real people.

### Cost

Security shouldn't be a compromise, and your budget shouldn't be an issue. Our SOCaaS has a fixed monthly cost. No expensive surprises.

### Customization

We don't just watch for 'normal' industry threats. Our machine learning will adapt to the behaviors of your specific cloud, network and users to create one-of-a-kind security operations center. Complete with customized dashboards.

## SO, WHAT'S INCLUDED?

- Zero upfront costs
- Fixed monthly fee based on number of log sources
- 24/7 Security Operations Center
- Managed cloud-based SIEM
- Real-time notifications and guided alerts
- Best in class integrations & visibility
- Threat hunting & intelligence
- Easy-to-use analytics and reporting dashboard
- Monthly review and recommendations
- Regulatory compliance
