

3 Reasons AgileBlue's Silencer Technology Helps You Stay A Step Ahead

We leave no vulnerability unchecked. AgileBlue is built around you: all your data, all the time, against all your threats.

Our Silencer uses advanced machine learning to ensure all alert responses are accurate, fast and efficient.

We can detect attack indicators before you're breached because we are not wasting time on false indicators with our 95% true positive confidence.

False Positives Are Nothing But Wasted Time And Money

Your Challenge	AgileBlue's Solution
Your team is exhausted from looking through logs all day.	Our real-time engine processes <i>thousands</i> of alerts, groups and silence the known false positives and assigns the true positives to our 24x7 expert team for further research.
You're wasting time on false positive alerts.	Our Silencer looks for both anomalous behaviors and known false positive traits to quickly identify false positives that meet accurate characteristics of previously silenced and known false positive alerts.
Your organization struggles with monitoring, detecting, preventing and responding to threats.	We understand it is not the number of alerts or vulnerabilities measured that is important. What matters most is what those measurements say about your organization's capabilities and behaviors.
You don't have resources working for you 24/7.	Your team, network, and data deserve intelligent and constant protection. This job is never done, but we've got it handled. We are monitoring for you 24 x 7 x 365.

About AgileBlue

AgileBlue is a SOC-as-a-Service platform that's proven to detect cyber threats faster and more accurately across your entire digital infrastructure and cloud. We provide 24/7 monitoring, detection and response to identify cyber threats before a breach occurs.

Our tech is intelligent and automated, but we take a custom approach for every client we work with, analyzing and detecting exactly what you need it to. Our products are 100% cloud-based including advanced machine learning and user behavior analytics backed by our team of cyber experts who are always just a call away. We detect threats before you're breached. Visit us online at AgileBlue.com.
